

**Eastern Wilderness Areas Act**  
January 3, 1975  
P.L. 93-622, 88 Stat. 2096; 16 U.S.C. 1132

Findings and Declaration of Policy

Sec. 2. (a) The Congress finds that--

(1) in the more populous eastern half of the United States there is an urgent need to identify, study, designate, and preserve areas for addition to the National Wilderness Preservation System;

(2) in recognition of this urgent need, certain areas of the National Forest System in the eastern half of the United States were designated by the Congress as wilderness in the Wilderness Act (78 Stat. 890); certain areas in the National Wildlife Refuge system in the eastern half of the United States have been designated by the Congress as wilderness or recommended by the President for such designation, and certain areas of the National Park System in the eastern half of the United States have been recommended by the President for designation as wilderness; and

(3) additional areas of wilderness in the more populous eastern half of the United States are increasingly threatened by the pressure of a growing and more mobile population, large-scale industrial and economic growth, and development and uses inconsistent with the protection, maintenance, and enhancement of the areas' wilderness character.

(b) Therefore, the Congress finds and declares that it is in the national interest that these and similar areas in the eastern half of the United States be promptly designated as wilderness with the National Wilderness Preservation System, in order to preserve such areas as an enduring resource of wilderness which shall be managed to promote and perpetuate the wilderness character of the land and its specific values of solitude, physical and mental challenge, scientific study, inspiration, and primitive recreation for the benefit of all the American people of present and future generations.
